CHAIRMAN SPEECH

Dear Shareholders, Colleagues on the Board, Auditors & Senior management team,

I welcome all of you to the 47th Annual General Meeting of Punjab Chemicals and Crop Protection Limited.

Thank you all for joining us on this online platform and I trust that you and your dear ones are keeping well.

The Annual Report for the year ended 31st March, 2023 along with the Boards' Report and the Audited Financials of the Company have already been circulated to you. I request your kind permission to take them as read.

The year 2022-23 was one of the most challenging in years for the global agrochemicals sector. The year was marked by record floods and droughts that impacted farm output across countries, coupled with increased power, fuel and freight costs. Besides, geopolitical challenges affected offtake, resulting in a pricing pressure in markets. Exports were impacted by currency volatility.

These factors affected the sector's earnings, your Company included. There was a premium on remaining nimble and responsive to market developments with the objective to protect the business model and Balance Sheet. A combination of various initiatives helped arrest the full impact of a decline in market sentiment. It is to the management's credit that the Company reported 7.79% revenue growth. The Company's EBITDA margin stood at 12.51% and net profit stood at 6.07%.

During the last financial year, your Company responded quickly to changes in the operating environment on the one hand and continued to invest in focused areas on the other. The result is that the Company reinforced its manufacturing processes, optimised costs, moderated waste cum energy consumption and increased environment responsibility. In addition to these tactical responses, your Company deepened its environment commitment and continued to build a strong products pipeline.

Your Company is dedicated for driving innovation and excellence in our operations with the latest technologies and research and development to support our focus areas including new product and process development, formulation and removing impurities. We are optimistic that a sustained research spending – in people, equipment, teams, certifications and processes – will widen our products portfolio, enhance the proportion of value-added products, deepen our recall around innovation, translate into first mover launches and strengthen our capital efficiency.

Your Company continued to transform its approach from mere product sales to solution provider to our partner Companies. Our capabilities in CRAMS is helping our Company to partner with several MNCs in complete value chain development. The outcome of these initiatives was that your Company was able to perform better than the broad market in the face of a weakening trade sentiment during the last financial year. More importantly, your Company is attractively placed to rebound quicker than the broad market as soon as the market sentiment revives.

In the current FY, the demand pace is losing steam owing to increase in Chinese dumping in various commodity chemicals which could continue for the next few months till channel inventory is minimum. Major economies entering recession would lead to slower pickup in global economies. Prices are witnessing decline owing to increased competition from exports market & demand uncertainties. Despite global headwinds, India still remains on a strong footing in chemicals led by increasing interest of global companies to source from India to de-risk their supply chain, increasing share of speciality chemicals in overall product mix and robust capex aligned by chemical companies to capture future growth. For Indian chemical companies, recovery in margins should be visible by the end of H1FY24. Pharma segment demand is flattish with no major uptick, except for the generic space which is the worst hit owing to increased competition. We anticipate correction of major API prices seems to be over. Agrochemicals demand is steady owing to higher crop prices, though high channel inventory & El Nino forecast could impact sales in the near term. Currently, crude oil prices are trading in a narrow band which

will provide stability in downstream chemical prices of basic chemicals. The cautious approach in chemicals is the impact of the global slowdown amid lingering recession worries which remains a watchful factor.

On the back of this performance, I am happy to inform that the Board of Directors have recommended a dividend of 30% (Rs. 3.00 per equity share) for FY 2022-23.

I would like to extend my immense gratitude to our customers, suppliers, employees, bankers, governments and the local residents for their continued support.

Without which achieving our mission to become India's most trusted companies would not have been possible.

Last, but not the least, our thanks to CDSL and its Executives, who have facilitated the arrangement of Audio / Video mode for this AGM.

I wish to thank my colleagues on the Board and team of PUNJAB CHEMICALS for responding positively to an unprecedented challenge and most of all, I thank our shareholders for the confidence and faith reposed by them in the Board and the Management team, which has in my view geared up to take on more challenges. I can say with confidence the Company will improve its performance further in the coming years. This is however only possible through tireless efforts; dedication and commitment of our team who have helped us reach where we are now and look forward to their continued commitment in the journey forward.

sd/-
(Mukesh Dayabhai Patel)
Chairman
